WORK EXPERIENCE

Travelport - Software Development Engineer II Jun 2022 - Present

Working on Travelport's new API portal and documentation web application.

Technologies used are React, Redux, React-router, Springboot and react-testing-library/jest for unit testing.

- Created frontend for user dashboard to view their API credentials using Redux for app wide state management.
- Migrated codebase to new routing management library version (react-router V6), including implementation of authentication and authorisation routes for the application.
- Participated in team effort to produce API documentation innovation using OpenAPI schema definitions.
- Regularly demoed new features across the organisation.

Travelport - Associate Product Owner Jun 2021 - Jun 2022

Product owner for a core team in Travelport's order management product that was primarily responsible for ticketing functionality across Air, Hotel and Car.

- Created and refined user stories for team.
- Organised cross-team dependencies.

Travelport - Product Intern Jul 2019 - Jul 2020

- Supported 5 different core products in different phases of their product lifecycle
- Created and presented a feature for one of **Travelport's mobile applications** including creating a lean business case and prototype.

EDUCATION

BSc Economics and Mathematics, Keele University (*First-Class Honours*) 2017 – 2021

SAFe POPM 5.0 2021 scaledagileframework.com

SAFe DevOps 5.0 2021 scaledagileframework.com
