

## Frontend Developer

# Lewis Casewell

I am ‘Product-focused, horizontal frontend developer’.

Product focused - I combine my 2 years in product with frontend development to strive for good user experiences, so that I am building products that users love.

Horizontal frontend - I am enthusiastic about sharing code + user flows across codebases and platforms. I think that applications in this era should work as great on mobile as on desktop, to keep a consistent and quality user experience.

## Details

Berkshire, UK

lewiscasewell@hotmail.co.uk

lewiscasewell.com

## Tech stack

HTML, CSS & JS

TypeScript

React/Nextjs

React-native

Node

Jest & react-testing-library

## Tools

Figma

JIRA

Sonarqube

## Passions

Aside from technology, I am obsessed with the gym. I have recently ventured into Calisthenics from a 6yr long weight-lifting background

## Education

Keele University

2017 - 2021

BSc. Economics and Mathematics

## Licenses & certifications

SAFe POPM 5.0 & SAFe DevOps 5.0

2021

scaledagileframework.com

## Experiences

Travelport - Software Development Engineer II

Jun 2022 - Present

- Working on Travelport’s new API web application, using React, Redux and Springboot.
- Created frontend for user dashboard to view their API credentials.
- Created frontend for several static pages and other functionality on the site, including forms and private routing.
- Regularly demoed new features across the organisation.

Travelport - Associate Product Owner

Jun 2021 - Jun 2022

- Supported leading a team for Travelport’s order management product to help support and deliver Travelport’s upgrade.
- Contributed towards refining the team’s backlog and the creation of user stories.
- Helped organise cross-team dependencies.

Travelport - Product Intern

Jul 2019 - Jul 2020

- Supported 3 different core products in different phases of their product lifecycle.
- Created and presented a feature for one of Travelport’s mobile application; including creating a lean business case and prototype.
